詳細條款列於SIMP市場計劃小冊內第7頁
This detailed terms and conditions shall be applied in reference to the TSI plan in the DXN SIMP booklet, appearing on page 7.

1 獎勵期/Promotion Period

旅遊研討會獎勵是公司一年一度所舉辦的獎勵活動，計算獎勵期由2019年1月1日開始，直至2019年12月31日內。共12個月

This TSI is an annually event organized by the company and is open to all DXN distributors. Its fiscal period commences on the 1st January 2019 and cut-off at 31st of December 2019, total 12 months

2 旅遊研討會獎勵目標分/Targeted Qualifying TSI Point

每一個國家有其自己特定的合格分數，香港2019年度的一年累積合格分數為150,000分(明星代理或以上適用)。Every country has its own qualifying points. In HK, 2019 accumulated qualifying point for Star Agent (SA) and above is 150,000 SA Points

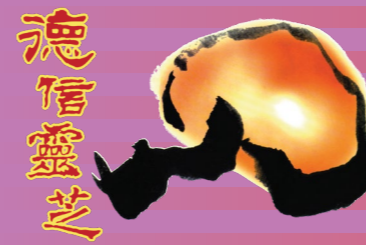

任何一個月，如明星代理之合格人數只得一個，將不能獲取旅遊研討會獎勵積分。
TSI Point for Star Agent (SA) and above received in any month will be disqualified if the number of QSA is only one..

公司及鑽石行政委員會保留收改條款權利。
Management and EDC reserve the right to change the term and condition.

恭喜! Congratulations!

DXN M Miracle

Marine Liposome
Vitality of the sea into your skin

Deep sea water algae, also known as the "herb of ocean". A skincare series that helps penetrate ingredients of marine resources, such as collagen, deep into skin through liposome technology.

1. Marine Herb Complex

Micro algae provides antioxidant substances such as enzyme, peptide, and natural substance, 'MMAs (My-cosporine-like Aminoacids)' by itself. MMAs absorbs UV rays to provide sun protection.

2. Marine Collagen

Marine Collagen is a collagen derived from marine elements like seaweed and algae. Such marine collagen can be found in our M Miracle Marine Liposome Skin Care Series and are generally used to improve skin condition.

3. Deep Sea Water

Deep sea water was taken from the Natural Energy Laboratory of Hawaii Authority, the world's largest deep-sea water industrial complex.

4. Peptide Complex

Promotes synthesis of collagen by using Peptide Complex (Acetyl Hexapeptide-8, Palmitoyl Tripeptide-1, Palmitoyl Tetrapeptide-7, Palmitoyl Tripeptide-5)

5. Liposome

Liposome technology applied in products acts like a vehicle guiding the beneficial properties from ingredients to be delivered into skin layers, offering an enhancement of bioavailability, biocompatibility and efficacy of skin care products significantly.

DXN Gempyuri For shiny skin like jewel

G1. Application of excellent fermentation technology to natural ingredients

GEMPYURI contains natural ingredients of pure supernatural energy and works with the skin cells. A natural cosmetic brand with ultimate high-performance developed that will help to optimize the skin condition.

G2. Application of 'Hydrolyzed RNA' technology, similar to human proteome

RNA is a component that controls the production in various substances for the skin. It also plays a role in giving skin rejuvenation and regeneration.

G3. Natural herbal preservatives

Consistent research and development over ten years has resulted in high technology, first patented as a natural preservative in the nation.

Main ingredients
